## PROFESSIONAL SUMMARY

---

Result-driven Software Test Engineer with over 6 years of experience in software testing, automation, and quality assurance. Proficient in creating comprehensive test strategies and designing automated test frameworks.

Experienced in delivering high-quality software solutions by identifying issues and optimizing test processes. Skilled in collaborating with cross-functional teams to ensure seamless software delivery. Passionate about leveraging innovative testing methodologies to enhance product quality and user experience.

---

## WORK HISTORY

---

**Specialist - Software Engineer**, 05/2019 - Current

**LG SOFT INDIA** – Bangalore

Specialist - Software Engineer

LG SOFT INDIA

Bangalore

(05/2019 - present)

- Proficient in manual and automated testing of mobile applications on Android and IOS platform.
- Conducted comprehensive functional, usability, and compatibility testing across diverse devices and OS versions.
- Conducted UI/UX testing to ensure mobile applications deliver a user-friendly experience.
- Experienced in mobile performance testing, focusing on memory usage, battery consumption, and network behavior.
- Collaborated with developers and stakeholders in Agile/Scrum environments to deliver high-quality mobile applications.
- Utilized bug tracking and test management tools like JIRA, Bugzilla for effective defect reporting.

4 years of experience in python Automation

- Designed and developed scalable test automation frameworks using python reducing manual testing efforts by 60%.
- Automated functional, regression, and API tests using Python libraries such as Pytest, Unittest, and Requests.
- Integrated automated tests into CI/CD pipelines using tools like jenkins, GitLab, and Bamboo for faster

deployment cycles.

- Experienced in web automation using Selenium with Python, enhancing testing coverage and accuracy. Created data-driven test scripts to handle complex test scenarios efficiently.
- Contributed to process improvement initiatives, increasing test efficiency and reducing defect rates.

---

## EDUCATION

---

**BCA:** Cloud And Security, Expected in 06/2026

**Amity University** - Bangalore

**Diploma:** Electronics And Communications Engineering, 07/2018

**SJM Polytechnic** - Birur

- Technician, BHEL, Completed @ 2011

---

## SKILLS

---

- Strong Knowledge of SDLC and STLC.
- Expertise in functional, regression, integration, and system testing.
- Strong understanding of agile methodologies and collaboration within Scrum teams.
- Hands-on experience in API testing and automation using tools like postman, RestAssured, and Python Requests library.
- Familiar with version control systems like Git for managing test code repositories and adept at mentoring team members on automation best practices and python scripting and Debugging techniques
- Proficient in creating detailed test cases, test plans, and test scenarios.
- Skilled in defect tracking and management using tools like JIRA, Bugzilla.
- Expertise in developing and maintaining test automation frameworks using Python, Skilled in web automation using selenium WebDriver with Python.
- Knowledge of BDD frameworks like Behave or Cucumber for python and Strong debugging skills and experience with log analysis for test failure investigation.
